Belarus and China Establish Cooperation in Digital Transformation

On September 4, 2025, the Minister of Communications and Informatization of the Republic of Belarus Kirill Zalessky held a meeting with the delegation led by the Deputy General Director of the digital technology company Sinomach Digital Co., Ltd. (People's Republic of China) Liu Guoqiang.

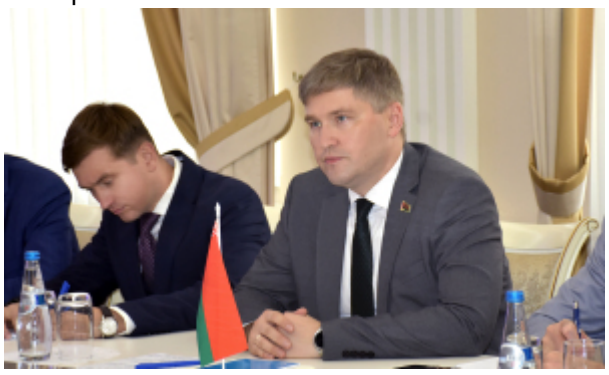

The Chinese side presented the capabilities of Sinomach Digital in the field of hardware and software for various industries and training models of artificial intelligence.

Reference. Sinomach Digital Co., Ltd. is a digital technology company founded in 2023. Participates in the implementation of the national strategies “Strong country in the field of production”, “Agricultural power”, “Digital China”. Assists in the implementation of the scientific and technological strategy “One Belt, One Road”, supporting digital, network and intelligent transformation of the machine-building and agricultural industries. Provides specialized services on digital transformation of small and medium-sized enterprises in PRC.

During the negotiations, the Minister noted that the Belarusian side attaches particular importance to cooperation with the People's Republic of China. Emphasized that the dynamic development of Belarusian-Chinese relations is primarily due to the common principles of domestic and foreign policy and a convergence of views on the most important issues on world agenda.

Kirill Zalessky also noted that the recent visit of the Head of State to China to participate in the SCO summit and the negotiations held confirmed the commitment of the parties to strengthen bilateral cooperation on various directions. In this regard, the Ministry of Communications and Informatization of the Republic of Belarus intends to study the proposals of the Chinese company and jointly determine mutually beneficial directions for cooperation.
